

1 Introduction

- Background needed to understand the paper.
- Motivation for why your problem is interesting.

2 Contribution Overview

- What did you do? How is it better?
- Then, in more detail, what did you do?
- If your report is more technical, give a high level description of your techniques here.

3 Contributions

- Flesh out your contribution.
- If your report is technical, here is where you put your proofs, benchmarks, experiments, tables, diagrams, etc.

4 Discussion

- Reflect on your contribution. Does it have limitations? Is there area for future work? Does it suggest that something needs to change?

5 Appendix

Add more context here.

6 Miscellaneous TODOs

- Mention how many hours we worked on this project.
